

Analyses & Displays for Laboratory Data

Project Scope

This project team will create a users guide or White Paper with recommendations for analysis and displays for Laboratory Data, with a focus on Phase 2-4 clinical trials and integrated submission documents. There have been 2 previous White Papers on this topic (1 for central tendency in 2013 and 1 for Outliers/Shifts in 2015). This paper will combine two method types and update recommendations given the advancement in interactive options.
