

Best Practices in Data Standards Implementation Governance

Project Scope
Best Practices in Data Standards Implementation Governance will cover the following areas: • Building and maintaining the contents of data standards repositories. • Extending data standards for individuals projects/studies. • Maintaining Sponsor extensions to data standards. • Scope of data standards governance: ◦ What areas should be covered by governance? (e.g. CRF, external data, tabulation, analysis, RWE, etc...). ◦ What should be governed centrally vs permitted on studies? • Feedback/communication to/with SDOs.
