

Data Transparency Summer Multi-day Event 2022

The PHUSE Data Transparency Summer Event 2022 took place 28-30 June and welcomed 500+ registered attendees. The event's agenda was dedicated to EU CTR and regulations, patient engagement, anonymisation and data sharing. Catch up on all three days by visiting the PHUSE [Archive](#).

Each presentation section was followed by a joint panel discussion/Q&A to further explore the latest developments in this fast-paced area of clinical development. Our event attendees were very engaged in the topics – we received a brilliant 85 questions across the event!

Take a look at the recently published blog for further details on the topics we covered each day.

"A big thank you to all involved in the Data Transparency Summer Event and for contributing to its great success."

PHUSE is proud to deliver the highest standards of content to the PHUSE Community, and we look forward to seeing you at the Computational Science Symposium in September."

Stephen Bamford
PHUSE Founder & Chairman of the Board

Thank you to our presenters across all three days, each day hosted live presentations and a joint panel discussion/Q&A session based on the content from the day.

Thank you to our DT Summer Event 2022 sponsors...
