

SEND Industry Feedback Surveys

Overview

Every year, the [SEND Survey](#) project team objectively collects data that enables detection of impactful issues and trends (both good and bad) that can be acted upon by the PHUSE community.

The annual SEND Industry Feedback Survey:

- provides SDOs with actionable information regarding improvements to their standards
- enables CROs, software developers and data service providers, with extensive data management experience, an opportunity to provide actionable recommendations
- provides Sponsors with information on how they can better leverage their SEND investments

Results of the survey are presented at the annual PHUSE/FDA CSS.
