Best Practices in Data Standards Implementation Governance

Project Scope

Best Practices in Data Standards Implementation Governance will cover the following areas:
 	
- Building and maintaining the contents of data standards repositories.
- Extending data standards for individuals projects/studies.
- Maintaining Sponsor extensions to data standards.
- Scope of data standards governance:
    - What areas should be covered by governance? (e.g. CRF, external data, tabulation, analysis, RWE, etc…).
    - What should be governed centrally vs permitted on studies?
- Feedback/communication to/with SDOs.
